Varilight V-PRO GRID Module for MK etc	✓ 10 lamps	TBC
Varilight JQP401W - Version 10+	✓ 10 lamps	TBC
Aurora AU-DSP400x	✓ 10 lamps	TBC
M2/CEF/RPP 1400DX	✓ 10 lamps	TBC
RPP/CEF DSP400 SW1	✓ 10 lamps	TBC
RPP/CEF DSP400 SW2	✓ 10 lamps	TBC
DETA S1261	✓ 10 lamps	TBC

During operation some combinations of approved dimmers and LED lamps/ fittings may exhibit a buzzing sound. This sound may be more pronounced in environments with very low DB levels and thus sound noisier.

Historically this noise may have come from vibrating components in the lamp, transformer and dimmer and the buzzing can still exist, but for different reasons. This could be due to the interaction of components from the circuitry in the dimmer and the lamp &/or driver. Additionally, the supply voltage can induce further noise which electronic circuitry is more

Dimmer recommended by Megaman, up to number of lamps stated.

Dimmer not recommended by Megaman.

TBC

To Be Confirmed due to tests pending.

Based on testing undertaken by Megaman. Megaman cannot accept responsibility for changes made by dimmer manufacturers. All information stated is correct at time of publication and is subject to change without prior notice. Please visit www.megamanuk.com for latest information.
