The Woodland Spa

Megaman Installation at The Woodland Spa.

LED GU10 and GLS lamps from Megaman UK are being used in a variety of applications at the new privately owned £4 million Woodland Spa, set within 100 acres of rolling landscape in the magnificent Lancashire countryside. Megaman's lamps were chosen for the project due to their cool running temperature as well as offering energy savings of up to 80%.

Case Study

The Woodland Spa

The Woodland Spa offers spa day packages along with a ladies state-of-the-art Technogym® gym, three specialist pools, two hot tub spas and an extensive thermal experience suite. The interior design was undertaken by Dorking based IDP Design who were also responsible for the overall conceptual lighting designs including large 'cigar' and pendant lighting in the restaurant and a bespoke fixture within the hydro pool area. Decorative lighting was created and supplied by Pendle based Chantelle Lighting who chose to use Megaman's LED GU10 and GLS lamps within specific areas of the spa.

Company Managing Director, Anthony Holly commented "We chose to work with Megaman as we find them to be a reliable and trustworthy business that carries good stock to meet our varying needs and we couldn't be happier with the end result".

Megaman's LED GU10 and GLS lamps are available in a variety of wattages and are a direct replacement for halogen lamps in terms of colour temperature and intensity. Both lamp types have instant start technology and narrow beam angles and offer a life of over 50,000 hours. The versatility of the LED GU10 and GLS lamps makes them ideal for a multitude of applications including hotels, restaurants, retail and domestic applications.
