

Megaman Toby Track Fitting Brightens Allfloors

Megaman's Toby fittings have been installed in the showroom of carpet specialist Allfloors in Amersham, Buckinghamshire. The fittings were specified by Bemco in Hatfield in a white finish to blend with clean lines of the decoration in the showroom and installed by Deeks Electrical Contractors Ltd, Harpenden.

The Toby AR111 GU10 track light fitting from Megaman is a cost effective track light, suitable for use with mains voltage AR111 GU10 LEDs and is part of the Megaman 3 circuit track range. Offering a wide angle of tilt at 170 degrees, the Toby will also rotate through 340 degrees. Ideal for track lighting installations, the Megaman AR111 GU10 operates on mains voltage and is dimmable. Providing twice as much light output as a 6W GU10 LED, this 15W AR111 produces 950 lumens, the equivalent of a 75W Halogen lamp. Available in a choice of 2800K warm or 4000K cool white colour temperatures, it is also available in a standard 45 degree or more narrow but intense 24 degree beam. The Megaman track lighting range is suitable for use in galleries, showrooms and retail environments.
